## Description

Shift2Zero is an initiative funded by the Horizon Europe program, aimed at revolutionizing urban logistics through the development of zero-emission electric light commercial vehicles (e-LCVs) tailored for specific missions. The project seeks to bridge the gap between current urban logistics needs and available mobility solutions, promoting more efficient, safe and sustainable vehicles.

## Objectives

- Development of new e-LCV vehicle;
- Improvement of urban logistics efficiency with a focus on e-commerce and temperature-controlled transport;
- Promotion of new operational models, such as the use of urban transshipment hubs;
- Support for the transition towards zero-emission logistics.
